

CABLE LADDERS, TRAYS AND DUCTS

CABLE MANAGEMENT FOR
HARSH ENVIRONMENTS

GULF GLASS FIBRE fabricate and supply cable ladders, trays and ducts for specialized applications. These are available in polyester, vinylester and phenolic grades of resins. Fire retardant sections conform to BS 476, Part 7 Class I & Class II and ASTM E 48. Phenolic sections are fire resistant.

These products are complemented by a range of supports and accessories all in GRP.

- ▶ Corrosion resistant
- ▶ High strength
- ▶ Easy to install
- ▶ Very light weight
- ▶ Maintenance free
- ▶ Hygienic in food applications

GRP resists corrosion by various liquids & chemicals and is the ideal choice for external applications with exposure to UV radiation. GRP withstands rapid temperature changes, shock, impact and effects of wind and weather.

Most suited areas of application would be:

- ▶ Industrial Construction
- ▶ Chemical & Petrochemical Plants
- ▶ Power Stations
- ▶ Food Processing Units
- ▶ Water Treatment Units
- ▶ Sewage Treatment Plants
