

CAR SHADES

FOR LONGER AND
BETTER PROTECTION

GULF GLASS FIBRE Car shades are designed to give maximum strength, coverage and aesthetic look. The car shades are light weight and can be coupled on their side to achieve larger spans with minimum required ground support.

The shades are primarily designed for cars and can also be used to cover:

- ▶ Swimming pools
- ▶ Shades in public areas
- ▶ Instrument shelter
- ▶ Villa entrances
- ▶ Walkways
- ▶ Equipment shelter

Car shades are generally 6.0 x 3.0 m on plan.

Other shapes and sizes can be purpose designed.

- ▶ Light weight
- ▶ Colour choice
- ▶ Low heat conduction
- ▶ High mechanical strength
- ▶ Withstands extreme weather
- ▶ Easy & Fast installation

Cantilever shades are also available for areas adjacent to walls where ground support is not permissible. The maximum cantilevering should be 4.5 m with the length varying to any extent, practically.
