

INSTRUMENT SHADES

REDUCE INSTRUMENT DRIFT

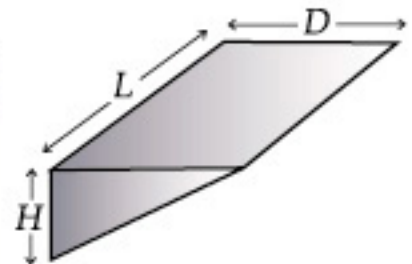

Field Instruments are exposed to severe weather conditions and need protection from these. GGF range of instrument shades is designed to provide shelter from the desert conditions as also the industrial environment.

When exposed to direct sunlight, the instrument surface temperature rises. GGF Instrument shades help reduce this effect of instrument drift and provides protection against rain or falling objects.

- ▶ Reflective white colour provides shade from UV rays
- ▶ Protection from rain and falling objects
- ▶ High strength GRP material
- ▶ Reduces instrument drift
- ▶ Designed for environment temperature ranges of -70.0c to + 80.0c

MODEL	Dim 'L'	Dim 'D'	Dim 'H'
GF-IS-A	360	450	360
GF-IS-B	530	640	430
GF-IS-C	730	580	360
GF-IS-D	250	300	100
GF-IS-E	830	640	430

Other sizes produced on request. Back plates & support poles are excluded.
